## MONEY MARKET FUND

### Investment Objective

The Fund aims to create a low-risk cash equivalent instrument providing consistent interest income while preserving capital and providing investors with a return in excess of what they would earn on related money market instruments.

### Investment Approach

The Fund invests in a collation of fixed income instruments including treasury bills, corporate debt, term and call deposits with banks, commercial paper, cash and cash equivalents and other money market instruments in Uganda and offshore markets. The manager uses an active top-down investment approach to assess the macro-economic environment and allocate the portfolio in such a way that it provides the best possible yield. The target overall duration for the fund is **6 months**.

The Fund is conservative and carries a low risk profile.

### Historical Fund Performance

	Nov-25	YTD	2024	2023	2022
Return (%)	10.37	10.66	9.7	9.0	9.4
Benchmark (%)	8.72	8.37	7.6	7.6	8.0

Return shown in the table is an annualized yield with the 91 Day bill shown on a net of taxes basis and as a benchmark and comparative return.

Recommended Investment Term : **3 months or more**.

### Macro-economic Environment and Market Commentary

The yield curve maintained a normal upward slope, with more pronounced steepness between a 91 and 364-day tenor before relatively flattening across longer maturities. Month-on-month movements remained subdued, with most tenors shifting by less than **10 basis points**. Notable exceptions were the 91-day, which declined by **41 basis points** as liquidity conditions remained sufficient, and the 25-year, which rose to **28 basis points** as investors sought additional compensation for extended duration.

S&P Global Ratings revised Uganda's sovereign outlook to positive from stable on 7th November, affirming the B-B ratings on the back of resilient growth and record foreign reserves of **\$5.4 Billion**. The Central Bank Rate (CBR) held steady at **9.75%** in the month of November.

Headline inflation eased to **3.1%** in November from **3.4%** in October, driven by a decline in food and related items inflation, which fell to **4.0%** from **6.1%**.

**Outlook:** Record foreign reserves and an improved sovereign outlook are a precursor to sustained macroeconomic stability.

With inflation well below the **5%** target, monetary policy is expected to remain accommodative, keeping borrowing costs favourable for businesses and households.

## Money Market Fund Risk-Reward Profile

- Issuers may not be able to repay their debts; the value of your investment will decrease if this happens. This risk is magnified where the Fund invests in a high-risk debtor.
- The Fund invests in instruments under volatile market environments and thus interest rates could vary on a regular basis.
- The Fund is more suited to investors with a short to medium term horizon; however, the investor can withdraw their funds within 48 hours from notice.
- Under circumstances where the Fund chooses to trade treasury bills, commercial paper and other related instruments, the number of buyers or sellers of those securities could be limited which would affect the Fund's ability to buy or sell those securities.
- Past performance is not a reliable indicator of future returns. Results may increase or decrease as a result of increases or decreases in interest rates and other considerations.
- Currency fluctuations could affect the value of the Fund in arrears where the Fund invests in offshore securities and where the investor considers their investment from the perspective of a foreign currency.
- The value of the investments and the income from them will all vary and there can be no assurance that the Fund will achieve its investment objectives.

## BOND FUND

### Investment Objective

To maximise total return and income per unit of relative risk. The Fund offers a competitive return without the risk of a fixed bond yield.

### Investment Approach

Seeks to maximise total return and income. The Fund intends to invest in term and call deposits with select banks, commercial paper, corporate debt, government bonds and other fixed income instruments in Uganda and offshore markets. The Fund places careful consideration to the quality of securities it chooses to invest in. The Fund uses an active top-down investment approach to assess the macro-economic environment and allocate the portfolio in such a way that it provides the best possible yield. The target overall duration for the Fund is **3.5 years**

— Bond Fund Bid Price (RHS) — SPFIUGT (LHS)

Recommended Investment Term: **2 years or more.**

### Macro-economic Environment and Market Commentary

The yield curve maintained a normal upward slope, with more pronounced steepness between a 91 and 364-day tenor before relatively flattening across longer maturities. Month-on-month movements remained subdued, with most tenors shifting by less than **10 basis points**. Notable exceptions were the 91-day, which declined by **41 basis points** as liquidity conditions remained sufficient, and the 25-year, which rose to **28 basis points** as investors sought additional compensation for extended duration.

S&P Global Ratings revised Uganda's sovereign outlook to positive from stable on 7th November, affirming the B-B ratings on the back of resilient growth and record foreign reserves of **\$5.4 Billion**. The Central Bank Rate (CBR) held steady at **9.75%** in the month of November.

Headline inflation eased to **3.1%** in November from **3.4%** in October, driven by a decline in food and related items inflation, which fell to **4.0%** from **6.1%**.

**Outlook:** Record foreign reserves and an improved sovereign outlook are a precursor to sustained macroeconomic stability.

With inflation well below the **5%** target, monetary policy is expected to remain accommodative, keeping borrowing costs favourable for businesses and households activity.

The Fund is moderate and carries a medium risk profile.

### Historical Fund Performance

	Nov-25	YTD	2024	2023	2022
Price Change (%)	1.1%	13.1%	12.5%	12.9%	3.9%
Benchmark Change (%)	1.6%	16.0%	11.1%	19.3%	5.7%

The return reflects a change in the Bid Price of the Bond Fund.

The Benchmark for the Fund is the S&P Uganda Sovereign Bond UGX Total Return Index (Bloomberg code: SPFIUGT).
