MONEY MARKET FUND

Investment Objective

The fund aims to create a low-risk cash equivalent instrument providing consistent interest income while preserving capital and provide investors with a return in excess of what they would earn on related money market instruments.

Investment Approach

The Fund invests in a collation of fixed income instruments including treasury bills, corporate debt, term and call deposits with banks, commercial paper, cash and cash equivalents and other money market instruments in Uganda and offshore markets. The manager uses an active top-down investment approach to assess the macroeconomic environment and allocate the portfolio in such a way that it provides the best possible yield. The target overall duration for the fund is 6 months.

Risk Profile

The fund is conservative and carries a low risk profile.

Sbg Securities

Core inflation remained steady at **4.2%** for the **12 months** to June 2025 driven by lower other goods inflation and stable annual services inflation.

Outlook: Uganda concluded its budget process last month, providing clearer guidance on the Government’s borrowing appetite amid persistently high interest rates. Efforts focused on managing risks related to rising borrowing costs and reinvestment challenges as the country approaches the 2026 general elections. Policymakers prioritized fiscal discipline to maintain debt sustainability and market confidence during this critical period.

Fund Maturity Profile

Money Market Fund Risk-Reward Profile

- Issuers may not be able to repay their debts, the value of your investment will decrease if this happens. This risk is magnified where the fund invests in a high-risk debtor.
- The fund invests in instruments under volatile market environments and thus interest rates could vary on a regular basis.
- The fund is more suited to investors with a short to medium term horizon; however, the investor can withdraw their funds within 48 hours from notice.
- Under circumstances where the Fund chooses to trade treasury bills, commercial paper and other related instruments, the number of buyers or sellers of those securities could be limited which would affect the fund’s ability to buy or sell those securities.
- Past performance is not a reliable indicator of future returns. Results may increase or decrease as a result of increases or decreases in interest rates and other considerations.
- Currency fluctuations could affect the value of the fund in arrears where the Fund invests in offshore securities and where the investor considers their investment from the perspective of a foreign currency.
- The value of the investments and the income from them will all vary and there can be no assurance that the Fund will achieve its investment objectives.
